

After a successful [Open-Earth-Monitor Global Workshop 2023](#) at EURAC, the Open-Earth-Monitor project is pleased to invite you to the [Global Workshop 2024](#).

This year, the conference titled “From EO data to policy impact: open EO data in support of environmental, biodiversity and climate policies”, will be held in Laxenburg, Austria, together with the [International Institute for Applied System Analysis \(IIASA\)](#).

The hybrid conference will take place from October 2nd to 4th 2024 and will host various sessions, from keynote presentations to oral talks, workshops, and poster presentations. **The first draft of the program is available via [this link](#).**

**Register now and get the Early Bird discounted price before the 15th of May. [Click here!](#)**

Regular registrations will close one month before the event date, on the 1st of September. As for students, registrations will open at the same time as Early Birds and close when Regular registrations close.

Do you know someone who might be interested in attending? Please forward this invitation.
